DETAILED ACTION

Response to Arguments

Applicant's arguments filed November 6, 2008, have been fully considered but they are not persuasive. Use of a trademark as a claim limitation renders a claim indefinite. The terms (SCONOX and SCOSOX) were not found to be commonly used or known as generic identifiers.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5-7 and 26 contain the trademarks/trade names SCOSOX and SCONOX. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods

Art Unit: 1793

associated with the trademark or trade name. In the present case, the trademarks/trade names are used to identify/describe catalysts for the removal of sulfur oxides and nitrogen oxides, respectively, and, accordingly, the identification/description is indefinite.

Allowable Subject Matter

Claims 5- 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: Boegner et al. (U.S. Patent No. 6,119,450) is considered the closest prior art. Boegner teaches a catalyst regeneration apparatus in which a sulfur oxide removal catalyst and a nitrogen oxide removal catalyst are placed in series. However, Boegner does not teach or render obvious a recirculation apparatus or a means for simultaneously regenerating both catalysts as set forth in the instant claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
